MANAGEMENT PROGRAM

Helping Students Grow into Leaders of
TODAY & TOMORROW

Introduction of Samriddhi School

It is the aim of Samriddhi School to provide K-12 education that every student deserves. Our goal at this school is to provide an outstanding education for all students. Here, creativity is nurtured, with learners being treated as learners, and making every student feel special and cared for.

Here, we appreciate diversity and realize that each student is different and should be treated as a unique individual. We believe there is no boundary for learning and therefore we always encourage trying out new ideas. It's a school for the 21st century leaders where learning is fun and life-long.

We are committed to inspire and motivate learners to achieve not only the highest standards of intellectual development but also personal growth, through a stimulating and comprehensive educational program. The emphasis will be on providing life skills and holistic development of learners along with other required domains..

Special Features of Samriddhi School

- Efficient first aid system with regular medical checkups
- Orientation programs for parents

Grade XI / XII Management Program

Samriddhi School Grade XI/XII Management Stream program aims to address demanding and incorporated management education from an early age so that students can adapt more easily to their undergraduate program. The school follows a scientific teaching technique, allowing students to match their subjects with dedicated insight. As a result, they come up with a clear model of the subject and develop their own ideas about them. Consequently, it helps the students track their higher studies with confidence.

Students can choose from Hotel Management, Travel & Tourism and Computer Science among others in order to support and augment their future careers.

Entrepreneurship Education

Samriddhi School is providing Entrepreneurship education to the management students. Entrepreneurship education basically focuses on creation of entrepreneurial success in a variety of settings. It helps potential entrepreneurs to identify and pursue opportunities. It is not limited to boosting start-ups, innovative ventures and new jobs. Entrepreneurship is a competency for all, helping young people to become creative and self-confident in whatever they undertake. We have scientifically designed curriculum, which is a blend of technical skills, soft skill and life skills. We add fun in learning by live projects, camps, smart classes and business games. As a specific objective, students learn to start up and run a business in theory. Lectures, case studies and business plan projects are used to promote entrepreneurship in classroom environments. They are taught the necessary knowledge and skills needed to start and manage a business.
